## ABOUT ME

---

I'm a Software Developer with experience building backend and web applications using java, Spring Boor, JavaScript, TypeScript and SQL databases. Strong foundation in software engineering principles, REST APIs, problem solving, and collaborative development workflows using Git and GitHub. Passionate about modern application development, AI-assisted engineering, and continuously learning new technologies.

## EXPERIENCE

---

### Teaching Assistant – Introduction to Data Analysis

National Technological University

Argentina

Actually

- Supported the delivery of undergraduate courses on data analysis and introductory statistics.
- Worked closely with professors to prepare learning materials and improve students' understanding of data analysis methodologies

### Teaching Assistant – Computer Architecture & Operating Systems

National Technological University

Argentina

2025-Actually

- Supported students in hardware and operating systems concepts
- Assisted with technical assignments and practical exercises

### Teaching Assistant – Mathematics & Statistics

National Technological University

Argentina

2025-Actually

- Assisted students with problem solving and technical concepts
- Strengthened analytical and communication skills

## SKILLS

---

**Skills:** Java, SQL, JavaScript, TypeScript, Spring Boot, RESTful APIs, HTML, CSS, Angular, Junit, Git, GitHub

## PROJECTS

---

### Video Game Store Platform

2025

- Developed a full-stack e-commerce platform for digital video games using Java, Spring Boot, Angular and MySQL.
- Implemented secure RESTful APIs, JWT authentication, shopping cart, wallet management, discounts and purchase workflows.

## EDUCATION

---

### National Technological University (UTN), Mar del Plata Argentina

University Technical Degree in Programming

2024-2026
